

BILSTEIN

4X4

For over 50 years Bilstein has been a unique driving force in the automotive industry. Bilstein was the first to apply the patented gas pressure principle to controlling ride characteristics on automobiles and introduced the world's first gas pressure shock absorber. Today, Bilstein continues to be the leader in monotube gas pressure shock absorber technology. No other shock manufacturer has been able to equal the performance and enhanced ride characteristics of Bilstein. From racing and testing in Formula 1, NASCAR, Rally, and Off Road to original equipment on Aston Martin, BMW, Bugatti, Ferrari, Jaguar, Lamborghini, Mercedes-Benz, Porsche, Subaru, Toyota and GM trucks Bilstein gas pressure shock absorbers have proven to be the benchmark.

Sydney Shock Absorbers recognises the unique conditions here in Australia. With the experience we have gained, we asked Bilstein to blend their leading shock absorber technology with local knowledge into a 4X4 shock absorber. The result is a shock absorber that has been developed for the most demanding conditions in the world with no compromise. Bilstein 4X4 shock absorbers are considered one of the best for ride, control and durability.

Our range of 4x4 Shock Absorbers is always growing! We have suspension solutions for all your 4x4 requirements and we are continually developing new products. Whether it is city driving, highway cruising, towing or recreational 4x4, the Bilstein 4x4 range will give you the performance you have always wanted.

Don't forget to check out the Off-Road Competition Suspension section in the back of this catalogue. If you can't see a product relevant to your 4x4, please contact our office on (02) 9557 5930 to speak to one of our sales staff, and we'll gladly answer your questions regarding your vehicle.

Bilstein Off-Road Competition Shocks are being used world wide on all different off-road vehicles. These shocks are rated specifically with serious off-road performance in mind. The rate listed here, is measured in Newtons per 0.5 Meter. Some of these shocks are threaded bodied, so you can turn them into Coil-Overs if your application requires them. For prices on any of these shocks, rates, or what we could possibly do for your off-road vehicle, please contact us during office hours, on;
